

SUSTAINABLE PROCUREMENT POLICY

Document No:	PINO.P.005
Issue Date:	20.12.2025
Revision No:	001
Revision Date:	24.12.2025
PageNo:	1

In line with our sustainable procurement approach, we prioritise that our suppliers and solution partners;

- ❖ Possess Quality Assurance Management Systems, Environmental and Occupational Health and Safety Management Systems, and internationally recognised environmental and sustainability labels/certificates.
- ❖ Ensure that their production and procurement processes have no harmful effects on the environment and comply with environmental regulations.
- ❖ Use and consume resources appropriately without harming wildlife or the ecosystem, and comply with hunting and fishing bans.
- ❖ Work to minimise their waste and manage it correctly, and offer alternatives for less packaging or bulk packaging in product delivery.
- ❖ Offer alternatives that are eco-friendly, resource-efficient, local, value-oriented, and use recyclable or recycled materials.
- ❖ Provide products that are organic, bio, vegan, not tested on animals, and do not contain harmful chemical components.
- ❖ Are domestic and local production or service providers.
- ❖ Provide products and services that reflect and promote the cuisine, traditions, and culture of our country and region.
- ❖ We communicate our perspective to our stakeholder suppliers. We strive to create efficient purchasing opportunities together with our suppliers and aim to reduce the environmental impacts arising from procurement processes.
